LIGHT CONTROL & PRIVACY AT YOUR FINGERTIPS

Interior shutters are now a popular choice for window treatments and offer you privacy, light control as well as looking elegant.

Our shutters are custom made and have a unique simple style that will complement contemporary and traditional interiors.

Available in a wide range of painted and stained finishes, and with a selection of styles, we can help you find the perfect solution to enhance your home.

At The Stylish Shutter Company we provide excellent service from start to finish including our expert shutter installation service.

INNOVATIVE

SHUTTER RANGE

The Vancouver

Made from Western Red Cedar, Vancouver is available in painted, lacquered oiled finishes. The “oiled” finish provides the most natural appearance of any shutter available and is the natural choice for barns and warehouse conversions. The timber is so durable and stable it could be left outside untreated due to its resin content.

The Portland

Our Portland shutters hardwood construction and a smooth and consistent grain make it a very robust and high quality shutter. Strengthened with an engineered core to prevent any possibility of warping, they are well suited to areas where extra durability is required either around the home or for commercial premises.

The Boston

Crafted from Basswood, Boston is a competitively priced hardwood and a popular material for shutters. Available in limited styles and five white and cream shades.

The Phoenix

Although a hardwood, this shutter is very light enabling us to confidently use Phoenix for large installations where the weight would definitely preclude the use of Seattle or similar weight hardwood shutter panels. The almost white timber stains to match most timbers accurately while the grain reminiscent of oak, appears rich and exuberant even when painted.

The Seattle

An engineered product comprising of the best off-cut timber, which is bound and laminated with epoxy to form a light, durable lumbar core in a choice of five extremely durable white and cream finishes. Maintenance free and very strong, with a wipe clean surface, this range is popular for its budget price but premium looks.

The Hollywood

Ideal for harsh environments such as wet rooms, or shower rooms, anywhere really that needs a tough but good looking window treatment that will last. The new closed-cell composite shutter technology ensures superior strength, stiffness and wont warp, dent or chip.

COLOURS

Choose from our extensive colour palette including paints, stains or a customised colour service to match your room décor.

SOLID SHUTTERS

Used extensively over the last couple of centuries in the UK, solid shutters offer better control over light filtration.

Solid shutters are fitted in the same way as louvre shutters and are used a lot for folding/concertina tracked partitions. They also make very good quality, light folding doors.

Solid raised

12mm thick centre panels with 28.6mm x 40mm stiles.

Solid raised

Solid moulded

Solid Base/Louvre Top

As solid raised but with top louvers, very suitable for sliding partitions and French Windows with solid bases.

QUALITY

STYLES & SHAPES

Interior shutters offer a stylish alternative to other window dressings. Options include full height, tier on tier, café style or bespoke shapes.

88.9mm

114.3mm

French Door Cutouts
Fitted on the door itself, used
for inward opening glazed
doors, typically with Juliet
balconies.

CONSERVATORY

Conservatory shutters, apart from looking great, offer a great deal of flexibility simply not possible with most other shading options. Unlike fabric based shading systems, shutters are easy to clean and will not rot, sag or age over time. For long sections they can be mounted on tracking to slid away when not in use.

Shutters are also used for partitioning and as multi fold internal doors. Quite often the opening to the conservatory may have shutters suspended on a top track. The solid base and louvre top shutters are used extensively for these applications.

PREMIUM MADE TO MEASURE WOOD VENETIAN BLINDS

**Phoenix 50mm, 63mm and Portland 35mm, 50mm,
63mm Wooden Blinds**

All Phoenix and Portland blinds can be made to your exact size and specifications and are available in widths 305mm – 2438mm and drops 254mm – 2438mm, with a variety of control positions.

Choose from a wide array of the latest and most popular paints and stains, matching our Phoenix and Portland wood blinds to our Phoenix and Portland wood shutters. Or why not opt for our custom colour matching service, and choose any Dulux or Farrow & Ball shade to compliment virtually any shade of room.

FITTING

At The Stylish Shutter Company we have a very experienced installation team.

There are many ways to fit shutters and there is no one way that is better than another. They can be fitted inside the reveal, the most common way, or on the edge of the reveal or outside the reveal.

The room and window will generally dictate the fitting location. Frames are used extensively for fitting and shutters are made square unless specially shaped and will not hide a subsided bay window or tilted window sill entirely.

Our hinges are made especially for our shutters and our screws are made specifically for our hinges with matching screw heads. Either match or contrast hinges with shutters, and for wet environments it is recommended that our marine grade stainless steel hinges are used.
